

LOGAN BISHOP-VAN HORN

lbvh@stanford.edu \diamond loganbvh.com

EDUCATION

Stanford University

M.S. Physics (Jan. 2019), PhD Physics (Jan. 2021 – present)

Advisor: Prof. Kathryn A. Moler

Research focus: Local magnetic response and proximity effects in two-dimensional superconductors.

Clark University

B.A. Physics & Mathematics, *summa cum laude*, highest honors in Physics (Dec. 2016)

Advisor: Prof. Charles C. Agosta

Honors Thesis: *Investigating the FFLO state in the organic superconductor λ -(BETS) $_2$ GaCl $_4$*

RESEARCH EXPERIENCE

Graduate Research Assistant

Sept. 2017 – Jan. 2019, Jan. 2021 – present

Stanford University Department of Physics, Moler Group

Stanford, CA

- \diamond Constructed two new cryogen-free scanning Superconducting QUantum Interference Device (SQUID) microscope systems: one capable of measuring samples at temperatures from 3 K to over 100 K, the other capable of measuring samples below 100 mK.
- \diamond Wrote a Python package for data acquisition in scanning SQUID microscopy, with an emphasis on modularity, measurement automation/throughput, and robust logging of experiment metadata.
- \diamond Developed software for simulating the magnetic response of 2D superconducting devices with arbitrary geometry using both London-Maxwell and time-dependent Ginzburg-Landau (TDGL) techniques.
- \diamond Performed large-scale nonlinear programming (NLP) to model the local magnetic response of disordered Josephson junction arrays.

Research Associate

Jan. 2019 – Jan. 2021

Quantum Circuits, Inc.

New Haven, CT

- \diamond Characterized, modeled, and optimized superconducting devices for quantum information processing using qubits encoded in microwave bosonic modes.
- \diamond Developed software for instrument control, automated calibration, and quantum device simulation.

Cornell Center for Materials Research REU

May 2016 – Aug. 2016

Cornell University Department of Physics, Advisor: Prof. Dan Ralph

Ithaca, NY

- \diamond Developed new tools in Python for performing and analyzing micromagnetic simulations of spin transfer torque-driven ferromagnetic resonance (ST-FMR) in spintronics devices.

Undergraduate Researcher

June 2014 – Dec. 2016

Clark University Department of Physics, Advisor: Prof. Charles C. Agosta

Worcester, MA

- \diamond Performed rf penetration depth measurements of quasi-2D organic superconductors in pulsed magnetic fields using a tunnel diode oscillator (TDO).

TECHNICAL SKILLS

Scientific Computing

Python, Git/GitHub, QuTiP, MATLAB, L^AT_EX, Bash, Slurm

Laboratory Experience

Superconducting electronics (dc to microwave),
superconducting qubits and cavities, scanning probe microscopy,
instrument control & automation, cryogenics, cryogen-free dilution fridges,
finite element & micromagnetic modeling,
rf measurement in pulsed & dc magnetic fields.

PRESENTATIONS

5. *Simulating the static magnetic response of thin film superconducting devices*. APS March Meeting 2022 (presented virtually).
4. *Designing, making, imaging and modeling landscapes of superfluid density in two-dimensional superconductors*. Energy Frontier Research Center Quantum Sensing and Quantum Materials (QSQM) Research Symposium, Feb. 15, 2022 (presented jointly with Irene P. Zhang, Emily N. Waite, and Prof. Nadya Mason).
3. *Quantum sensing with superconducting qubits*. Energy Frontier Research Center Quantum Sensing and Quantum Materials (QSQM) Research Symposium, Sept. 10, 2021.
2. *Cryogen-free variable temperature scanning SQUID microscope*. APS March Meeting 2019, Boston.
1. *New details in the superconducting phase diagram of λ -(BETS) $_2$ GaCl $_4$: further evidence of a FFLO phase*. APS March Meeting 2017, New Orleans.

OPEN SOURCE PROJECTS

SuperScreen	A package for modeling the magnetic response of 2D superconducting devices
SeQuencing	A framework for simulating and benchmarking realistic quantum control sequences using QuTiP, the quantum toolbox in Python

TEACHING & MENTORSHIP

Teaching Assistant, Physics 21/22, Mechanics, Fluids, and Heat Lab <i>Stanford University Department of Physics</i>	Sept. 2022 – Dec. 2022 <i>Stanford, CA</i>
Teaching Assistant, Physics 67, Intro to Laboratory Physics <i>Stanford University Department of Physics</i>	April 2022 – June 2022 <i>Stanford, CA</i>
CAMPARE Graduate Student Mentor <i>Stanford University Department of Physics</i>	June 2018 – August 2018 <i>Stanford, CA</i>
Teaching Assistant, Physics 43, Electricity and Magnetism <i>Stanford University Department of Physics</i>	April 2018 – June 2018 <i>Stanford, CA</i>
